

EXPAND YOUR EXPORT POTENTIAL

MARCO's key to success in international markets is having comprehensive hardware and software accreditations from weights and measures boards across the globe.

Having a fully accredited packing system means that you can legally declare the weights of packed produce secure in the knowledge that this will be accepted by your trading partners anywhere in the world. These credentials have allowed MARCO's packing systems to be installed in over 45 countries worldwide.

MARCO's language-transparent systems are ideal for international operators, and MARCO's in-house software can be tailored to operate in any language chosen by the client.

MARCO is authorised by the National Measurement Office to carry out full EC verification (90/384EEC).

Other certifications include:

- NTEP for the USA
- NAWI for Europe
- CSA for Canada
- NRCS for South Africa
- NSI for Namibia
- OIML R76 for Europe, South America and Africa
- NMI S720 for Australia
- NMi UKCA-371 for UK & EU
- UKWF for UK & EU
- IND/13/16/363 for India
