

MARCO TRAC-IT[™]

Goods Received Module

The MARCO Trac-IT Goods Received Software Module (GRM) is expertly designed for businesses across all industries, with a particular focus on fresh produce and food manufacturing.

**Full goods intake control
for all raw materials**

Developed to ensure complete traceability of raw materials from goods intake to consumer-ready packaging, it optimises and connects your entire operation, delivering enhanced management insights and greater operational control.

MARCO[®]

Smart Weighing Technology Experts

AN **ATS** COMPANY

GRM tracks pallets, containers, and punnets of raw materials, assigning them to designated storage locations. This provides complete management oversight of the handling and movement of all raw materials within your facility.

KEY FEATURES OF GRM

- Goods intake control
- Barcode scanning & label printing
- Increased accurate reporting
- Raw material traceability
- Real time dashboards
- Regulatory compliance

Seamlessly integrating with all MARCO applications, GRM offers enhanced optimisation for your facility and provides full traceability of materials, allowing them to be assigned to production lines or returned to storage as needed.

BENEFITS OF GRM

- Enhanced efficiency and productivity
- Quickly adapt to changing market conditions
- Increased management insight
- Integrates easily into existing ERP
- Eradicate intake losses/waste
- Speed up the intake & inventory process
- Increased traceability

All intake information is securely stored in a centralised database, making data management, access, and retrieval seamless.

COMPLETE TRACEABILITY & CONTROL
