

MARCO Trac-IT® RECIPE FORMULATION MODULE

Recipe Formulation can be a complex and challenging operation that requires a high level of process control and reliable traceability.

From generating Bill of Materials (BOM) to final mixing, MARCO's operator-friendly workstations will guide the operator through the intricate process, ensuring strict ingredient and manufacturing rules are followed.

Employing MARCO's hardware and software systems to scan and label ingredients and mixes reduces human error and avoids costly spoiled batches.

The easy-to-use touchscreen interface helps simplify the process by using colourful clear instructions to guide the operator.

This improves the overall performance and productivity of operations in addition to providing complete management insight, process control and forwards and backward ingredient traceability throughout.

**Accuracy, Traceability &
Consistency**

KEY FEATURES OF RFM

- Step-by-step guidance through the formulation process using MARCO's easy to use, operator friendly workstations
- Increases speed and precision of the ingredient mixing process
- Minimises costly spoiled batches
- Ensures the safety of operators through real-time hazard warnings & health and safety messaging
- Provides accurate live weight and stock level data reporting

BENEFITS OF RFM

- Removes time-consuming paperwork
- Increases speed and precision of the ingredient mixing process
- Minimises costly waste
- Ensures the safety of operators through real-time hazard warnings
- Eliminates time-consuming paperwork to manage formulation procedures
- Easy to use, operator friendly workstations
- Provides accurate live weight and stock level data
