

AVERAGE WEIGHT SPECIFICATION SHEET

MARCO's TRAC-IT **Average Weight Module (AWM)** is an offline weight sampling system designed to ensure compliance with average weight legislation. Featuring an intuitive interface,

MARCO's DataMaster Touchscreen Terminal provides clear instructions, guiding operators through the sampling process with real-time updates on average weight and enforcing scheduled checks.

The touchscreen terminal has a Certified Indicator integrated to comply with CE standards.

AWM is typically used standalone with reports accessible via a local network.
