

WASTE MANAGEMENT SPECIFICATION SHEET

MARCO's TRAC-IT **Waste Management Module (WMM)** is an application for capturing waste information at strategic locations throughout the factory.

Utilising the MARCO DataMaster touchscreen terminal connected to a suitable scale, users are guided through the process with clear instructions and relevant images.

Images can be used to identify key information to help reduce errors and speed up the process.

Operators are prompted to enter the required information, including:

- Waste Source
- Waste Container
- Waste Type
- Raw Material, Packaging, etc.
- Product

Reports can be generated to show by specified date range:

- Total Waste – All Lines
- Total Waste – Specific products.
- Total Waste – Per Line
- Total Waste – Per Waste Type
