

## GOODS RECEIVED MODULE

### 1 Summary

The MARCO Goods Received Module (GRM) is a powerful application for capturing raw material details as they enter the facility.

Using the DataMaster Touch Screen Terminal connected to a scanner and suitable scale, users are guided through the booking-in process with clear on-screen instructions and relevant images.

Barcode labels are automatically generated as each item is booked in, enabling seamless scanning during production, providing real-time stock reporting but also provides end-to-end traceability.

Effortless integration with other MARCO Software modules creates a unified data environment that enhances traceability across your entire operation.

### 2 Key Features & Benefits

|                                  |                                    |
|----------------------------------|------------------------------------|
| Real-Time Process Control        | Reduced Overpack/<br>Giveaway      |
| Enhanced Quality Control         | Increased Productivity             |
| Legal Compliance<br>and Auditing | Improved Operational<br>Efficiency |

### 3 Industries

-  FRESH PRODUCE
-  CONVENIENCE FOOD
-  FISH
-  MEAT/POULTRY
-  DAIRY
-  HERBS
-  FORMULATION
-  BAKERY

### 4 Service & Support

The **MARCO Hi-Care support programme** is offered with all our products to ensure that your MARCO system is fully supported in the most efficient and timely manner. [Find out more](#)

Unleash the power of real-time data with **MARCO INSIGHTS**, our IoT-powered solution.

This advanced system harnesses the power of data visualisation and analytics, presenting actionable information in an intuitive and accessible manner.
