

## RECIPE FORMULATION

### 1 Summary

MARCO's Recipe Formulation Module (RFM) is designed to deskill, monitor and control a recipe formulation process, from ingredient raw material to finished product.

Its two main interfaces:

1. PC application for managing recipes and related process controls.
2. Touchscreen application for following recipe instructions, such as weighing and collation.

With RFM customers can greatly improve finished product consistency whilst controlling and capturing every step of an ingredient's journey from Goods-In to Finished Product.

Clear instructions are displayed on the touchscreen terminal guiding an Operator through every step, showing incorrect lot or ingredient messages, warning of allergens, hazardous materials and any PPE requirements at the relevant stage.

### 2 Key Features & Benefits

End-to-End Traceability	Reduced Waste
Consistent Product Quality	Fewer Spoiled / Rejected Batches
Food Safety & Compliance	Increased Inventory Control
100% Paperless	Actionable Production Insight

### 4 Service & Support

The **MARCO Hi-Care support programme** is offered with all our products to ensure that your MARCO system is fully supported in the most efficient and timely manner. [Find out more](#)
