

YIELD CONTROL

1 Summary

MARCO's Yield Control Module (YCM) is a centralised production management system using smart weighing technology for data capture and analysis.

The system has proven to:

- Increase Productivity by 30%
- Reduce Waste / Overpack to less than 2.5%
- Provide complete production & packer traceability

YCM de-skills the packing process enabling operators to focus on quality and consistency by following clear instructions to achieve the desired target weight.

The traffic light system on the scales provides feedback for the operator to make any required adjustments.

RED NO – GREEN GO

Operator and batch statistics are captured and recorded ensuring user accountability and enabling supervisors to take corrective action in realtime.

2 Key Features & Benefits

Accurate, live data by operator	Eradicate Giveaway /Overpack
Integrate easily into existing ERP	Track Packs Per Minute
Eradicate Paperwork	'Just in Time' Accuracy
Rapid Return on Investment	Deskill Operations

3 Industries

- FRESH PRODUCE
- FISH
- DAIRY
- FORMULATION
- CONVENIENCE FOOD
- MEAT/POULTRY
- HERBS
- BAKERY

4 Service & Support

The **MARCO Hi-Care support programme** is offered with all our products to ensure that your MARCO system is fully supported in the most efficient and timely manner. [Find out more](#)

Unleash the power of real-time data with **MARCO INSIGHTS**, our IoT-powered solution.

This advanced system harnesses the power of data visualisation and analytics, presenting actionable information in an intuitive and accessible manner.
