

TRAYMASTER

End-of-Line Efficiency Delivered

1 Summary

The MARCO TrayMaster automates the final stage of the packing process by accurately picking and placing punnets and clamshells into trays or boxes. Designed to reduce manual handling, improve packing efficiency and increase throughput, it provides a reliable and flexible end-of-line solution for fresh produce operations.

With speeds of up to 20 cycles per minute and compatibility with a wide range of pack formats, the TrayMaster helps businesses reduce labour costs while delivering consistent performance and rapid ROI.
